

# Community Connections

Sanofi in Pennsylvania

Summer 2025 Environmental Edition

**One of Sanofi's strategic pillars is Caring for our Planet, which includes:**

- **Reducing the environmental impact of our activities and products while strengthening the resiliency of our business**
- **Reducing the environmental impact of the delivery of our care**

**Raising awareness about the environment and providing hands-on volunteer opportunities for education on caring for our planet are two important parts of this pillar.**

## Sanofi Partners with the Nature Conservancy of PA and DE

A good size group of Sanofi employees took volunteer time away from our Swiftwater campus to spend the day working with The Nature Conservancy's Land Steward, Emily, at the Long Pond Preserve. The group collaborated as a team to successfully install 20 bluebird boxes in record time. These bluebird boxes will help create habitat for bluebirds in the Long Pond area, another practical example of caring for our planet.

*Sanofi employee-volunteers venturing beyond the workplace, caring for our planet (l to r): Guy DeBruyne, Jacob O'Neil, Emily Tramontino (The Nature Conservancy), Hayden Berner, Richard Paules, Cynthia Walker, Nathaniel Butler, James Syracuse, Mike Lemons, Deanne Vincent, Kayla Zorechak, James Youwakim and Christopher Nelson*

## Sanofi Funds The SCI-Q Project

Poconos students in grades 8 through 10 spent a week this summer exploring the world through science in The SCI-Q Project. Funded by Sanofi and held at the Pocono Environmental Education Center (PEEC), located in the Delaware Water Gap National Recreation Area, this summer science camp opened the eyes and minds of aspiring scientists. The camp featured local college professors showcasing their research, hands-on exploration of different pathways to STEM careers, as well as field trips, canoeing, hiking and other activities in the great outdoors.

## Earth Day Volunteering at Cherry Valley National Wildlife Refuge

*Volunteers at Cherry Valley National Wildlife Refuge set out with tree saplings on a wintry April day.*

**E**arly this spring, volunteers, including a group led by the Swiftwater site's Adrian Meza, planted trees at Cherry Valley National Wildlife Refuge in Stroudsburg, Pennsylvania. Despite being greeted

with a blanket of snow and ice, these hardy souls did their part to care for our planet in a meaningful and sustainable way. Cherry Valley NWR is affiliated with the U.S. Fish and Wildlife Service.
